**Towns:** Chester, Middlefield, Worthington  
**Acreage:** 4,916  
**Wildlife Management Zones:** 2, 4N

**Description of property:**  
Northern hardwoods including American beech, maple, birch, and white ash, along with scattered white pine comprise most of the forest. Eastern hemlock is found along stream corridors, shaded ravines, and poor drainage areas. Norway spruce plantations grow along Chipman Road. Elevations range from 700 feet along the Middle Branch of the Westfield River to 2000 feet at Pelton Hill in Middlefield.

**Location/Access/Parking:**  
Parking areas are located at pull-offs along Main Road, Chipman Road, and East River Road in Middlefield, as well as at Buffington Hill Road and West Street in Worthington.

**Habitat Management:**  
Habitat forest cuts have been conducted off of Chipman Road between 2005 and 2007. These cuts have created young forest which is exceptional habitat for a variety of wildlife species.

**Hunting Opportunities:**  
White-tailed Deer, Wild Turkey, Ruffed Grouse, Snowshoe Hare, Black Bear, Bobcat, and Fisher all inhabit this WMA. The large hardwood area, young forest, and the overall variety of habitats provide excellent food and cover for these species.

**Fishing Opportunities:**  
A portion of Moss Meadow Brook and its headwaters are located in the western parcel of this WMA. The Little River which borders and bisects the eastern parcel is stocked with trout. For more information, visit Mass.gov/Trout.

**Wildlife Viewing and Other Features:**  
Numerous nongame species are associated with the forest habitat and moose occasionally inhabit the area.

**Special WMA Regulations:**  
None
